

## PULSOXIMETRE POIGNET

### Digital Sleep Wrist Oximeter

Digital Sleep Wrist Oximeter provides spot check measurements of oxygen saturation of arterial hemoglobin. It monitors SpO2 and pulse rate while sleeping or during other daily activities. It has a multi-color OLED display along with Perfusion Index, Plethysmograph capabilities, 72 hour data storage and optional data management software for storage onto computers. Widely used in home health-care facilities, sleep apnea centers, hospitals, as well as in the home to treat a wide variety of illnesses including CPAP, COPD, and many more...

### Features

- CE Approved
- Lightweight and easy to carry
- Accurately measures SpO2 value and pulse rate
- Measures perfusion index
- Plethysmograph capabilities
- Memory and review of data up to 72 hours
- Data transfer to PC for storage
- High-quality OLED multi-color display
- Audio and visual alarm functions
- Low voltage indicator
- Auto-shut off function
- 2 years of warranty
