

## ELECTROENCEPHALOGRAPHE 8 TRACES SUR PORTABLE

### Digital 8 channels EEG system

Brand new design of a PC based ultra compact digital electroencephalograph which allows EEG recordings in difficult and extreme environments, using the advanced USB technology.

Different filters, different montages, real-time spectral analysis, and brain map monitoring are performed by the powerful Windows XP/VISTA® platform.

Printout of EEG and patient data to laser or thermal printer, as well as automatic event search, and local network support, are available with all Neurotravel® systems.

Management of all data, including the visualization of EEG recordings and patient data, is performed easily using the keyboard or mouse.

#### Standard configuration:

##### Digital EEG Pocket USB

EEG acquisition unit at 8 channels, EEG WIN software, **with laptop computer 15" TFT color monitor**, accessories kit and operator's manual on CD.
